

Get On The Green

Holganix Is a Hole in One!

Holganix is a completely natural, organic bio-nutritional product that promotes strong turf and plant health, naturally increasing resistance to disease and insect damage by promoting significant root and cell wall development.

Our patent-pending process begins with a proprietary plant-based compost tea that sets Holganix apart from the competition. We then add a variety of beneficial nutrients and microorganisms like mycorrhizae, streptomyces, trichoderma, protozoa, auxins, yucca extract, chitin-degrading bacteria and humic and fulvic acids.

By recreating the vital soil environments naturally found in the rich forest floor, Holganix provides strong, sustainable growth and helps you minimize the hazards of traditional chemical fertilizers and pesticides. Continued use of Holganix will reduce the amount of these products by significant amounts.

The end product is a powerful, organic solution used by golf course superintendents and turf grass managers to achieve results on par with (or exceeding) traditional stand-alone fertilization techniques.

How Can Holganix Improve Your Game?

- Deeper, Denser Root Systems
- Thatch Reduction
- Balanced Soil Building
- Insect Suppression
- Disease Suppression
- Fertilizer Reduction
- Improved Soil Biology
- Pesticide Reduction
- Stronger Seedlings
- Denser, More Upright Growth
- Reduced Surge Growth

Get On The "Green" Program

Due to the need for fungicide applications during the summer months, applying Holganix in the spring and fall provides the best results. If used during fungicide program months, application should be made in the off week for optimal outcomes.

Sample Greens Program

Fall

10 oz/k after aerification
7 oz/k 4 weeks later

Spring

10 oz/k after aerification
7 oz/k 4 weeks later

Rates

7 to 10 ounces per 1,000 feet at 2 gallons per 1,000 feet finished volume

When dealing with turf that has persistent disease, apply Holganix every 14-21 days at a rate of 7-12 ounces per 1,000 square feet.

Tees, Fairways, Roughs

Contact a Holganix representative for sample programs regarding tees, fairways and roughs.

NOTE: Fertilizers can be safely applied in conjunction with Holganix. However, due to increased nutrient uptake capabilities created by Holganix, amounts may be reduced by up to 90%.

To learn more about how Holganix helps golf course superintendents and turf managers reduce inventory, cut costs and minimize the environmental impact, visit holganix.com, or call (866) 563-2784.
