

## **PRODUCT DESCRIPTION SHEET**

### **LAKESIDE SOD KENTUCKY BLUEGRASS BLEND**

Our Bluegrass Blend is adapted to this region and is designed to provide a high quality, dense, hardy turf for use in golf course fairways, tees or collars, home lawns, athletic fields, industrial sites, cemeteries, and other similar turf areas.

The continued fine performance of this turf depends greatly on a good maintenance program. With proper management, a dense and uniform quality turf will remain for many years to come.

#### **PERFORMANCE CHARACTERISTICS:**

- Tolerant to local climate extremes and varying soil types
- Uniform color, texture and growth habits
- Medium to dark green color retention throughout the growing season
- Performs well under high or close mowing heights
- Excellent wear tolerance
- Moderate shade tolerance
- Dense, low growing, tightly knit turf providing excellent lawn characteristics
- Grown on mineral soil.

#### **DISEASE TOLERANCE (IF WELL MAINTAINED)**

High level of tolerance to:

- Leaf Spot

Good tolerance to:

- Powdery Mildew
- Dollar Spot
- Stripe Smut
- Rust
