

HOLGANIX GRANULAR

- Builds healthier soil & deeper roots
- Allows fertilizer to work more efficiently

**Holganix
10-0-0
with Biodac**

**Holganix does
all the work
without all the
nitrogen**

Holganix® is a 100% natural bionutritional product, made with a patent pending process. It begins with a plant based compost tea concentrated and then adds numerous beneficial nutrients to create an optimal formula.

When Holganix is blended with Biodac® the result is a granular bionutritional product second to none. This product acts as a catalyst achieving results comparable to lawns using a much higher nutrient value fertilizer. It works synergistically with Mother Nature to add organic matter and vital microbial life to the soil. The result is a more natural living soil using nutrients and water more efficiently while building deeper and denser root systems for healthier overall turf.

Holganix Granular is part of a balanced bionutritional program at times when liquid applications are not an option.

The key benefits:

- Biodac – optimizes the carbon:nitrogen ratio by increasing the presence and availability of organic matter
- Mycorrhizae and *Trichoderma* – beneficial fungi that help build a deep, strong root system
- Nitrogen fixing bacteria – improves turf color by releasing natural sources of nitrogen and making nitrogen uptake more efficient
- Iron and other trace elements such as copper, zinc and boron

Results you can see:

- Deeper, thicker root system
- Greatly improved organic matter in the soil
- Healthier plants and soil are better able to resist damage from insects and disease
- Consistent color with less surge growth (less clippings)
- Very low burn potential
- Improved drought tolerance and recovery
- Significant improvement in biology of the soil
- Improved plant vigor

Product Characteristics:

Granular
Consistent granule size
Particle Size: 180 SGN
Very low dust
No offensive odor
Spreads well with commercial spreader
Net weight: 50lb bag
Coverage: 12,500 sq ft.

*Holganix granular is the perfect bionutritional alternative to Holganix liquid blend 66L – CT when liquid applications are not an option.
